- Builder - Glastonbury Housesmith
- Geothermal heating and cooling system
- Rotating PV on steel pole array (powers all appliances, LED lights, hot water heater, heating and cooling system plus extra power for future electric car)
- Grid connected PV but able to get power when grid goes down.
- ENERGY STAR appliances
- Heat pump clothes dryer
- Induction cook top
- Attractive aluminum roofing shingles (70 year lifespan)
- Triple pane windows (glass orientation-specific solar heat gain maximizing winter solar heating and reducing summer cooling)

- Low VOC GREENGUARD - certified components (insulation, drywall, joint compound, wood finishes)
- Oak flooring from trees on property with tung oil finish
- Thermomass centrally insulated foundation (R20 insulated value)
- Energy recovery ventilator that exhausts stale or humid indoor air and provides conditioned fresh air
- Naturally cooled root cellar (56° without using any power) tornado shelter
- Framing withstands higher than code-required hurricane wind loads
- Energy-Efficient sealed wood burning fireplace
- Beautiful and comfortable home for a family of four people
